

PRECISE DESIGN | SMART PROCUREMENT | ENGINEERED INSTALLATION

ENGINEERED PANEL SYSTEMS

Industrial Performance Solutions

SIPANEL delivers fully engineered sandwich panel solutions-from, precision design and smart procurement to controlled installation and guaranteed performance

BUILDING WITH PRECISION DELIVERING WITH CONTROL

At SIPANEL, we believe that great projects start with precision and succeed through control

Our commitment is to provide engineered sandwich panel systems that deliver performance, efficiency and long-term value

We take pride in being a trusted partner to our clients from the first drawing to the final installation

Thank you for considering SIPANEL as part of your next success story

Arash Soleimani
Chief Executive Officer
SIPANEL

INDUSTRIAL PROJECTS DON'T FALL BY CHANCE

They fail due to poor planning, weak coordination, and lack of engineering control.

In industrial construction, small mistakes can lead to significant financial and operational losses. Lack of proper design, incorrect purchasing decisions, and poor execution often result in delay, rework, leakage and compromised performance.

MATERIAL WASTE

Excess materials due to lack of planning

WRONG PROCUREMENT

Unsuitable products selected without proper evaluation

INSTALLATION ERRORS

Poor alignment, weak sealing, and inaccurate execution leading to leakage.

DELAYS

Uncoordinating processes causing missed deadlines and extended schedules.

HIDDEN COSTS

Extra expenses from rework, logistic issues, material loss, and poor planning.

PERFORMANCE FAILURE

Weak insulation, unstable joints, and reduced durability due to lack of control.

The real risk is not the material - it is the lack of **controlled engineering process**

CONTROL THE PROJECT. NOT JUST THE MATERIAL.

The SIPANEL integrated system transforms fragmented processes into a controlled engineering workflow

We don't just supply panels. We manage every critical step—from engineering to execution—to ensure your project is delivered on time, on budget, and with guaranteed performance

THE SIPANEL INTEGRATED SOLUTION SYSTEM

01

ENGINEERING

Technical Site Assessment
Engineering Consultation
Precision Shop Drawing

02

PROCUREMENT

Verified Manufacturer Selection
Quality-Controlled Supply
Coordinated Delivery

03

EXECUTION

Supervised Installation
Precision Assembly
Performance Testing & sealing

END-TO-END PERFORMANCE ASSURANCE

We take full responsibility for the entire system to deliver long-term performance you can rely on

One system. One responsibility. **one predictable result.**

WHAT YOU ACTUALLY GAIN

Choosing SIPANEL is not just a purchase-- it's a strategic investment in performance, cost control, and reliability

Our integrated system delivers measurable value across every stage of your project

REDUCED COST

Eliminate waste, rework and hidden expenses

REDUCED COST

Eliminate waste, rework and hidden expenses

REDUCED COST

Eliminate waste, rework and hidden expenses

REDUCED RISK

Minimize errors, delays, and on-site uncertainties

FULL RESPONSIBILITY

One accountable partner managing the entire process from start to finish

PEACE OF MIND

confidence in performance durability, and long-term reliability

With SIPANEL, you don't just build faster- you build **smarter**, **safer**, and with **certainty**.

WHY SIPANEL?

PROVEN EXPERTISE. TRUSTED EXECUTION.

We combine engineering excellence, advanced systems, and decades of experience to deliver industrial projects with precision, quality, and confidence.

30+

YEARS

INDUSTRY EXPERIENCE

400+

COMPLETED

SUCCESSFUL PROJECTS

RECORD-SPEED

EXECUTION

WITHOUT COMPROMISING
QUALITY

ENGINEERING CAPABILITY

- Full-scope engineering from concept to execution
- complex structures: flat, curved, dome
- Experienced technical engineers and designers
- All major sandwich panel systems

PROJECT TYPES

- Industrial facilities
- Warehouses and distribution centers
- Sports and multi-purpose halls
- specialized environments ,cold storage, clean rooms (food, pharmaceutical)

EXECUTION EXCELLENCE

- Skilled and certified installation teams
- Precision shop drawing execution
- No rework philosophy
- Strict quality and safety standards

CLIENT CONFIDENCE

- Real-time project monitoring and updates
- Transparent communication at every stage
- Warranty and [performance guarantees
- Full accountability from start to finish

OUR COMMITMENT

- Engineering power in every detail
- Controlled execution at every step
- Long-term performance you can rely on
- Building partnerships that last

**WE DON'T JUST COMPLETE PROJECTS-
WE DELIVER THEM RIGHT, THE FIRST TIME.**

REAL PROJECTS. REAL RESULTS.

EVERY PROJECT REFLECTS OUR COMMITMENT TO
PRECISION, PERFORMANCE, AND RELIABILITY.

From industrial facilities to specialized structures, SIPANEL delivers high-performance results across diverse project environments.

HOW WE EXECUTE YOUR PROJECT

A CLEAR PROCESS

CONSISTENTLY EXCEPTIONAL RESULTS.

Every successful project is the result of a structured controlled, and coordinated execution process

01 | PROJECT ANALYSIS

- Site evaluation
- Requirement understanding
- Technical review

02 | ENGINEERING DESIGN

- Shop drawings
- Structural detailing
- System planning

03 | PROCUREMENT CONTROL

- Supplier selection
- Material verification
- Logistics coordination

04 | INSTALLATION

- Supervised execution
- precision assembly
- On-site coordination

05 | QUALITY & DELIVERY

- Inspection
- Testing
- Final handover

EVERY STEP IS ENGINEERED. EVERY DETAIL IS CONTROLLED.

NO GUSSWORK. NO REWORK. NO COMPROMISE

OUR PANEL SYSTEMS

HIGH-PERFORMANCE SANDWICH PANEL SYSTEMS
DESIGNED FOR DURABILITY, INSULATION, AND
STRUCTURAL RELIABILITY ACROSS INDUSTRIAL APPLICATIONS

01

WALL PANELS

Insulated Wall System

- Excellent thermal insulation
- Clean and modern appearance
- Vertical or horizontal installation
- High strength & durability

02

ROOF PANELS

Insulated roof System

- Superior weather resistance
- High thermal performance
- Optimized drainage design
- Fast and precise installation

03

COLD STORAGE PANEL

High Insulation Systems

- High insulation performance
- Airtight and moisture resistant
- Ideal for food & pharma
- Temperature controlled environments

04

SPECIAL SYSTEMS

Engineered for Your Need

- Fire-resistant panel options
- Acoustic performance panels
- Custom-engineered solutions
- Project-specific requirements

PANEL STRUCTURE

ENGINEERED IN EVERY LAYER

Our sandwich panels are built with premium materials and advanced manufacturing technology to deliver exceptional performance

EXTERIOR FACE SHEET

High-quality coated steel for durability and superior weather resistance

INSULATION CORE

High-density PIR / PUR for excellent thermal insulation and energy efficiency.

INTERIOR LINER SHEET

Smooth, coated steel for clean finish and long-term protection

ENGINEERED FOR PERFORMANCE. BUILT FOR RELIABILITY.

ENGINEERING BEHIND EVERY DETAIL

At SIPANEL, every project is built
on precise engineering logic-not assumption.

From initial concept to final execution, every component
is planned, calculated, and coordinated. This approach
eliminates uncertainty and ensures consistent performance
across every project.

OUR ENGINEERING PRINCIPLES

01

PRECISION PLANNING

Every element is carefully
planned and detailed before
execution begins.

02

SYSTEM INTEGRATION

All components are designed
to work together as one
coordinated system.

03

MATERIAL OPTIMIZATION

Right materials are selected
specified and optimized for
performance and durability

04

EXECUTION READINESS

Everything is engineered
verified and prepared before
it reaches the site.

05

PERFORMANCE ASSURANCE

Every engineering decision
supports long-term reliability
safety and efficiency.

“

**WE DON'T LEAVE
PERFORMANCE TO CHANCE**

We engineer it. We control it.
We deliver it.

EVERY LINE IS **DESIGNED**. EVERY MATERIAL IS **SELECTED**. EVERY DETAIL IS **CONTROLLED**.

PRECISION STARTS WITH SHOP DRAWINGS

Every successful project begins with accurate detailed, and coordinated engineering drawing.

At SIPANEL, shop drawings define every dimension connection, and sequence before execution begins ensuring accuracy, coordination, and error-free implementation.

SHOP DRAWING PURPOSE

ELIMINATE
UNCERTAINTY

IMPROVE
COORDINATION

ELIMINATE
UNCERTAINTY

01 SUBSTRUCTURE DESIGN

- Structural layout
- Load distribution
- Support alignment

02 GUTTER DESIGN

- Water flow planning
- Positioning accuracy
- Drainage slope

03 DOWNSPOUT DESIGN

- Drainage routing
- Flow capacity
- Connection detailing

04 PANEL LAYOUT

- Cutting optimization
- Joint positioning
- Installation sequence

05 FLASHING DETAILS

- Edge finishing
- Joint protection
- Weather sealing

06 SEALING & FILLING

- Leak prevention
- Thermal continuity
- Airtight connections

ACCURACY A THIS ELIMINATES ERRORS ON SITE.

MEASURED, COORDINATED, READY FOR EXECUTION.

SMART PROCUREMENT. CONTROLLED QUALITY.

Every component is carefully selected, verified and coordinated before delivery to the project site.

SIPANEL ensures that all materials meet strict quality standards and are delivered in alignment with project requirements-eliminating delays, mismatches, and performance risks.

BATCH VERIFICATION

All materials are inspected and verified before dispatch

MATERIAL TEACEABILITY

Every batch is traceable to ensure quality and reliability

DELIVERY COORDINATION

Materials are scheduled and delivered in sync with project phases

PROCUREMENT CONTROL

SELECTION
Choose the right materials for performance

VERIFICATION
Quality, specification and compatibility are confirmed

DELIVERY
Materials are delivered on time and in perfect condition.

COORDINATION
All components are prepared and organized for execution

01

GUTTER SYSTEM

- Pre-fabricated accuracy
- corrosion-resistant material

02

DOWNSPOUT SYSTEM

- Flow capacity design
- Connection compatibility

03

SANDWICH PANELS

- Verified insulation core
- Consistent thickness

04

FLASHING COMPONENTS

- Custom-fit detailing
- Edge protection

05

FASTENERS (SCREWS)

- Loading-rated fixing
- Corrosion resistance

06

ADHESIVE & SEALING

- Weather resistance
- Long-term durability

07

FILLING FOAM

- Thermal continuity
- Gap sealing

QUALITY IS CONTROLLED BEFORE INSTALLATION BEGINS.

SELECTED, VERIFIED, DELIVERED WITH PRECISION.

PRECISION IN INSTALLATION

Every installation step is executed with precision coordination, and strict safety standards.

SIPANEL ensures that on-site execution follows a structured sequence-combining technical accuracy, safety protocols and experienced supervision to deliver flawless results.

SIPANEL

SAFETY COMPLIANCE

All works are executed in accordance with strict HSE standards

EXPERIENCED SUPERVISION

Skilled teams and engineers ensure precision at every step

QUALITY CHECKPOINTS

Continuous inspection ensures consistency and reliability

INSTALLATION PROCESS

01

HSE PREPARATION

- Safety setup
- Site readiness

02

SUBSTRUCTURE WORK

- Cutting & welding
- Alignment control

03

GUTTER INSTALLATION

- Slope accuracy
- secure fixing

04

PANEL INSTALLATION

- Precise alignment
- Joint accuracy

05

DOWNSPOUT INSTALLATION

- Flow connection
- Secure routing

06

FLASHING INSTALLATION

- Edge finishing
- Protection sealing

07

FILLING FOAM

- Gap filling
- Thermal continuity
- Joint insulation

08

SEALING

- Airtight joints
- Weather resistance

09

TESTING

- Inspection
- Performance check

EXECUTION IS CONTROLLED AT EVERY STAGE.

SAFE, PRECISE, RELIABLE.

CRITICAL CONNECTION DETAILS

Performance is defined at the connection level-
where structure, insulation, and sealing work together.

SIPANEL ensures that every joint, and interface is
engineered to maintain structural integrity, thermal continuity,
and long-term durability

THERMAL INSULATION

Maintains temperature
performance and
energy efficiency

WATER RESISTANCE

Engineered to prevent
water penetration at
every connection

AIRTIGHTNESS

Sealed joints prevent
air leakage and
improve performance

STRUCTURAL STRENGTH

Connections are
designed to handle
loads and movement

01 PANEL JOINT DETAIL

✓ Tight interlocking system ensures thermal continuity
and prevent air & water infiltration

02 ROOF EDGE / FLASHING DETAIL

✓ Edge flashing and sealing protect the
roof edge from water ingress and uplift.

03 GUTTER CONNECTION DETAIL

✓ Proper slope, secure fixing, and sealing ensure
controlled drainage and long-term performance

04 WALL-TO-ROOF CONNECTION

✓ Continuous insulation, sealing, and flashing
ensure structural and weather performance

05 BASE CONNECTION DETAIL

✓ Secure anchoring and moisture protection
deliver stability and durability

06 SEALING & FOAM DETAIL

✓ Combining foam, and sealant delivers airtight
joint and thermal insulation continuity

QUALITY CONTROL & PERFORMANCE TESTING

Every project is inspected, tested, and verified to ensure performance, safety, and long-term reliability

SIPANEL applies strict quality control procedures at every stage- from installation checks to final performance testing-ensuring that every system meets engineering standards and project requirements.

QUALITY ASSURED

Every step is controlled

EXPERT INSPECTION

Skilled engineers ensure precision and compliance

VERIFIED PERFORMANCE

Tested, measured, and documented

RELIABLE RESULTS

Performance you can depend on

01 PRE-INSTALLATION CHECK

- Material verification
- Drawing compliance

02 INSTALLATION CONTROL

- Alignment inspection
- Fixing verification

03 POST-INSTALLATION CHECK

- Joint inspection
- Sealing verification
- Filling foam continuity check

04 FINAL TESTING

- Water leakage test
- Airtightness check
- Visual inspection

NOTHING IS DELIVERED WITHOUT VERIFICATION.

TESTED. VERIFIED. APPROVED.

SIPANEL

TESTING CATEGORIES

WATER TIGHTNESS TEST

Ensures the system is completely watertight under pressure

AIRTIGHTNESS CHECK

Verifies air leakage performance for energy efficiency

THERMAL PERFORMANCE REVIEW

Confirms insulation continuity and thermal performance

STRUCTURAL INSPECTION

Ensures mechanical strength and secure installation

APPLICATIONS ACROSS INDUSTRIES

Engineered solutions tailored to the performance needs of every sector

from large-scale industrial facilities to specialized environments, SIPANEL delivers reliable panel systems tailored to each application's performance and operational needs.

HIGH PERFORMANCE

Engineered for maximum efficiency and durability

ENERGY EFFICIENT

Excellent insulation for lower energy consumption

FAST INSTALLATION

Prefabricated systems for faster and safer construction

RELIABLE & SAFE

Tested systems ensuring safety hygiene and reliability

01 INDUSTRIAL FACILITIES

- Factories
- Production halls

HIGH STRENGTH
LARGE SPAN

02 WAREHOUSES & LOGISTICS

- Storage centers
- distribution hubs

FAST INSTALLATION
EFFICIENT OPERATIONS

03 SPORT SALOON

- Indoor sports hall
- Training facilities

ACOUSTIC COMFORT
THERMAL PERFORMANCE

04 COMMERCIAL BUILDINGS

- Showrooms
- Retail spaces

MODERN APPEARANCE
ENERGY EFFICIENT

05 AGRICULTURAL STRUCTURES

- Poultry farms
- Livestock buildings

DURABLE
HYGIENIC ENVIRONMENT

06 SPECIALIZED PROJECTS

- Clean rooms
- Pharmaceutical facilities

PRECISION ENVIRONMENT
HIGH HYGIENE

ONE SYSTEM. MULTIPLE APPLICATIONS. PROVEN PERFORMANCE

ADAPTABLE. RELIABLE. SCALABLE.

ONE PARTNER TOTAL PROJECT CONTROL

From design to delivery, every stage is controlled, coordinated, and verified.

REDUCED
PROJECT RISK

FASTER
DELIVERY
